SUMMARY

Computer Science undergraduate (Uniritter), Freelance Software Developer, and IT Intern at Procempa. Strong background in backend (Java/Spring, Python/FastAPI) and mobile development (iOS/Swift), currently serving as technical lead for a private application. Experienced in Artificial Intelligence, automation, and data processing, complemented by corporate IT support and infrastructure experience. With a track record in award-winning projects, I combine analytical problem-solving and leadership to deliver secure, scalable, and functional software solutions.

EDUCATION

Middle and High School (Completed)

2009 até 2023

- Colégio Marista Assunção

Higher Education

2024/1 - 2024/2

- PUCRS - Bacharelado em Engenharia da Computação

Higher Education (In Progress)

2024/2 - Present

- PUCRS - Bachelor's in Computer Engineering

MAIN SKILLS

- | | | |
|--------------|--------------|----------|
| • Java | • Swift | • Git |
| • Spring | • JavaScript | • GitHub |
| • PostgreSQL | • Node.js | • AWS |
| • MySQL | • C | • Kanban |
| • Python | • Linux | • Scrum |

ACHIEVEMENTS

- Outstanding Young Researcher PUCRS - 2012
- Outstanding Young Researcher UFRGS - 2012

EXPERIENCE

Freelance Software Developer — Grupo Nexo Life — 05/2026 (Present)

- Technical leadership and full-stack development of the Nexo Life platform (mobile app and web dashboard) for home care management. Responsible for the TypeScript monorepo architecture using NestJS, PostgreSQL/Supabase, React Native, and Next.js, implementing core features such as geolocation check-in and digital signatures, as well as designing CI/CD delivery pipelines via GitHub Actions and EAS.

IT Intern — Procempa — 05/2026 (Present)

- Technical support for workstation hardware and software, incident diagnostics, and ticket resolution, contributing to preventive maintenance and corporate system updates.

Freelancer in Data Processing and Extraction 10/2025 - 06/2025

- Extraction, parsing, and structuring of data from unstructured documents (PDFs, timesheets, pay stubs) for conversion and data analysis into Excel and CSV formats.

Virtual Reality Developer — BMVerso Project (Uniritter) 2024/2 - 2025/1

- Development of a Virtual Reality (VR) digital twin using Unreal Engine for tactical simulations and field training for the Military Police.

Programming Instructor (Python) — Jovem Tech Project (Uniritter) 2024/2

- Python programming instructor for youth from Vila Cruzeiro, fostering digital inclusion and teaching programming logic through accessible, hands-on lessons.

CERTIFICATIONS

- Foundations - Apple Developer Academy: iOS Development and Design Thinking.
- Learning Paths in Java (Spring Boot and REST APIs), Python (FastAPI), and JavaScript - Alura.
- Amazon AWS Cloud Foundations and Cisco Network Technician (Networks, TCP/IP, and Security).
- Software Engineering, Quality Assurance (V&V/CI), Agile Methodologies, and SQL Data Modeling - Uniritter/Alura.
- Cybersecurity 2025 (Santander): Digital Security, Cryptography, and Network Protection.

- Portuguese: Native Proficiency
- English: Intermediate Level (B1)
